Greetings to you dear investor!

In this section, you will learn a number of simple steps to purchase the AutoCash tokens.
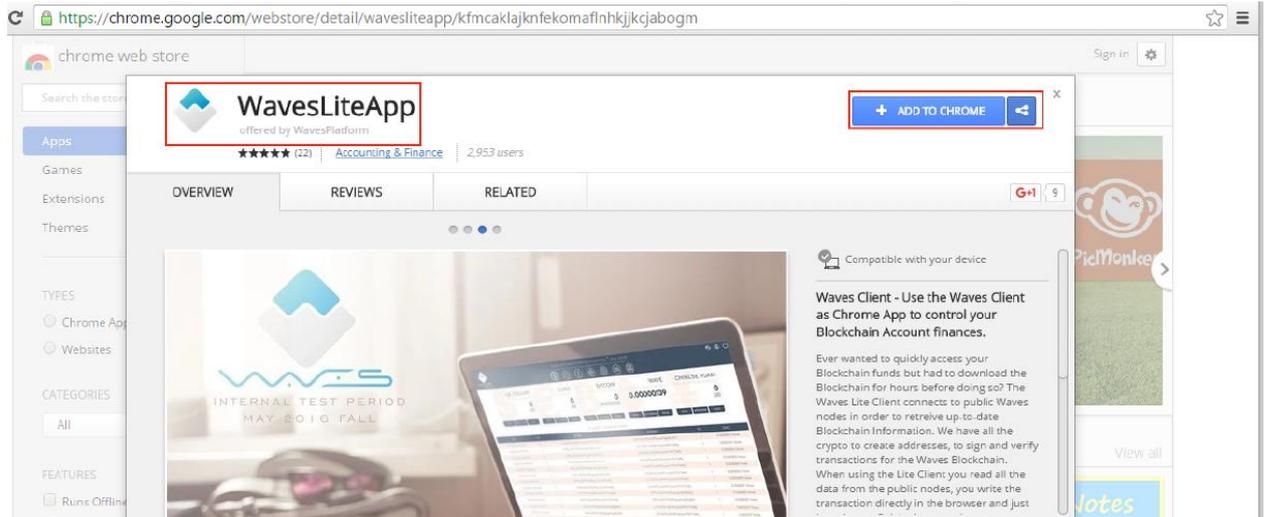

1. **Register a wallet on the Waves platform in advance https://waveswallet.io/**

**In detail:**
To create a wallet, click on the following link:
https://chrome.google.com/webstore/detail/wavesliteapp/kfmcaklajknfekomaflnhkjjkcjabogm.
After installing the extension, the lite-client wallet will be available in your Google Chrome browser.

Opening a wallet

After installing the lite client extension in your Google Chrome browser, you need to specify the address "chrome://apps/" in the address bar to go to the wallet and go through it. To start the purse in the window that opens, click on the lave client icon Waves
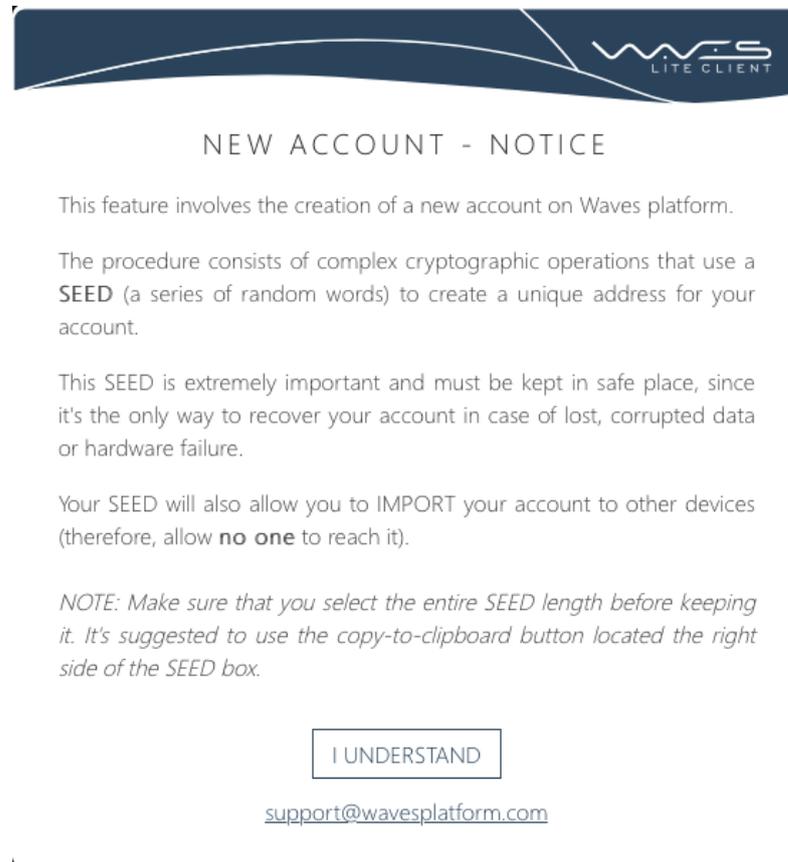

Creating of new account (NewAccount)

To create a new Waves account, when you open the lite client for the first time, click "NEW ACCOUNT".

After clicking on the button "NEW ACCOUNT" the following window will appear:

When you click on the "I UNDERSTAND" button, you agree that you have read the text above and also understand the basic principle of the cryptographic operation using the SEED value.

Important about SEED
SEED is a private key consisting of 15 words selected using cryptographic algorithms.

WAVES uses the "brainwallet" technology, meaning the absence of the .dat file, in which the private key is stored. Instead of this file, WALLET SEED is used, which is a sequence of random 15 words that allow access to the WAVES address.

Lose your SEED = lose access to WAVES tokens and WAVES assets. We strongly recommend that you write down your SEED on paper in several copies and store them in safe places.

Important. Sid format: at the beginning of the first and last words in the combination there are no spaces, there are spaces between words.

After clicking on "I UNDERSTAND" a SEED phrase will be generated and your Waves address

Important. WALLET SEED on the screenshot is for an example.

Description of registration form fields

WavesAddress

Your personal address. One seed only generates one address.

"Name" field
In this field you need to specify your name.

"Password" field

Password format: The password must contain at least one number, one capital letter and one uppercase letter. The password can not be shorter than eight characters.

After clicking on "REGISTER" the Waves wallet main page will open.

The purse address specified in this interface can be used to send and receive Waves and Waves-Assets.
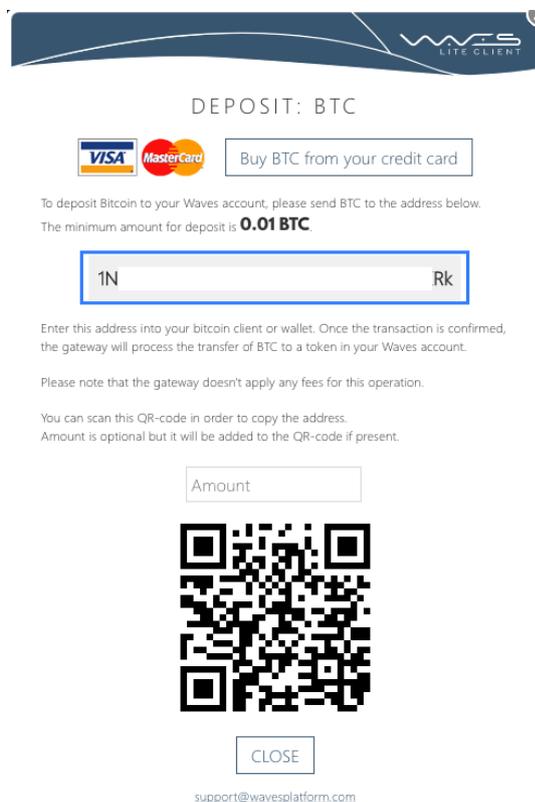

Enter bitcoin into the system

1. Click on "Deposit";

2)   In the window that appears, copy the bit-address of your Waves account.

Important. *The minimum amount of replenishment of your bitcoin-wallet Waves-account is **0.01 BTC + commission transaction.** If a smaller amount is sent, the bitcoins will not be credited to the purse. If successful arriving bitcoins on the account, the amount will be displayed on the main page of the Waves account in the "BITCOIN" section.*

For your convenience, we remind you that bitcoins are credited to the purse of the Waves account after the first confirmation in the bitcoin network..

The status of your incoming Bitcoin transactions can be checked through the search form located in the upper right corner of the page: https://blockchain.info/ru/. For this purpose it is necessary to drive the address of your Bitcoin wallet-Waves account.
